

# TORNADO

Light machine only for air plasma cutting. It is light, easy assembled profile cutting machine with high level of accuracy. Integrated cutting extraction table. An effective exhaust of the combustion products protects health of cutting machine operators.

This machine performs the best ratio of high level of precision with budget spends for buying it. Designed for cutting thin and medium thick plate by air plasma.

# Technical Features

Cutting type	Plasma
Cutting width, mm	1250 – 3000
Cutting length, mm	2000 - 3000
Quantity of tools (supports for torches)	1
Max. thickness of material for plasma torch, mm	35
Max. cutting current of plasma, A	125
Type of CNC (option)	MARLIN-7'(10')
Type of motor:	step (option) / easyservo (option) / servo
Max. moving speed, mm/min	10 000
THC plasma	Include
Position accuracy / Repeating accuracy, mm	0,1 / 0,3-0,4
Extraction table	Separate
Power input kW	2.5
